Seashell Art Frame

Materials:

- Variety of small seashells
- Frame with double-sided glass
- White acrylic paint
- Mod Podge
- Paint brush
- Hot glue
- Paper towels
- Jute string

Steps:

- Take a frame with double-sided glass (we used a small 4x4 inch frame for this project, but you can use any size that works for you) and paint the frame white to create a white-washed, beachy look.
- Once the acrylic paint has dried, apply a layer of Mod Podge to seal and finish the paint in place.
- Now you can begin to design your seashells into whatever shape you like.
- Once you have your shells and pattern decided you can then begin applying hot glue to each shell and attaching it into place.
- The last step is to take a piece of jute string and attach with a knot at the back of the frame.

Now you're ready to display your new handmade beachy seashell art frame!
