

Book Wreath Kit

Materials included:

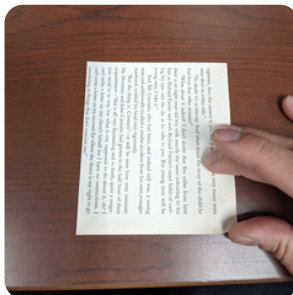

- 50 book page sheets
- 1 cardboard cake round
- 1 glue stick
- ribbon or twine

You will also need:

- scissors

Step 1: Making Paper Cones

Start rolling up from the bottom corner of the sheet

Roll the sheet towards the opposite corner

When you're halfway,
turn the roll towards
the edge of the paper
to make a cone shape

Add glue to the edge
of the sheet
and pinch it together

A finished cone
should look like this

Continue until you have
at least 45 cones

Step 2: Putting the Wreath Together

Starting from the top,
glue the cones onto
the cake round

Leave some space
between each cone

Once you're finished with
the first layer, continue
filling the gaps with
paper cones

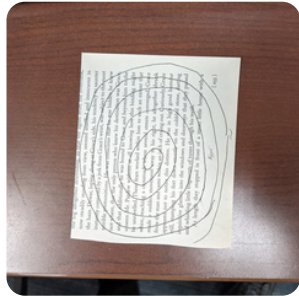

Fill in any other
gaps as needed
until your wreath
is complete

Step 3: Paper Flower

Draw a spiral on one of the paper sheets

Trim the corners of the sheet so you have a circle

Cut along the line
of the spiral so you have
one long strip

Start to roll the spiral from
the edge to the center

Try to keep the
roll together

Add glue to the center,
and then pinch the roll
to the remaining paper

Glue the paper flower
to the center of
the wreath

Add ribbon or twine
to the loop in the back
and your wreath
is now ready

Notes
